

Franchise Law

Our franchising group is small but powerful. We act for both franchisors and franchisees and are uniquely positioned to identify the strengths and weaknesses of the industry from all perspectives.

We guide franchisors through all aspects of franchising including, start-up and disclosure, acquisitions and sales, licensing, marketing, financing, supply chain and even through to disputes with franchisees.

We also assist franchisees with understanding franchise documents and navigating disputes with franchisors, landlords and many other parties affiliated with a franchise system.

Our lawyers have acted in some the seminal franchise cases and for some of the largest franchisors in the country.

Our firm's expertise extends to various other areas of the law which impact key issues in franchising such as intellectual property, leasing, financing, competition and distribution law.
